List of Contents

NUMBER 1

S. Yang, Y. J. Chao and **M. A. Sutton**	1	Higher order asymptotic crack tip fields in a power-law hardening material
Li Sen Chen and **Jao Hwa Kuang**	21	Comparison of two quarter-point element extrapolation equations for three-dimensional mixed-mode problems
Chen Chuan-Yao and **Gao Da-Xing**	25	Durability evaluation for components by simulating fatigue test and extreme value analysis
K. Fujii, Y. Kato, S. Duan and **K. Nakagawa**	31	Stress analysis around a partially bonded rigid cylinder in an elastic medium with process zones
A. Fuji, M. Kitagawa and **A. T. Yokobori**	39	An experimental study of behavior of low alloy steels in the initial growth stage of creep cracks
R. M. V. Pidaparti, W. A. Boehmer and **M. W. Beatty**	51	Fracture analysis of dental composites
D. M. Stump and **E. Zywicz**	61	J-integral computations in the incremental and deformation plasticity analysis of small-scale yielding
D. G. Harlow and **R. P. Wei**	79	A mechanistically based approach to probability modeling for corrosion fatigue crack growth
Chyanbin Hwu	89	Fracture parameters for the orthotropic bimaterial interface cracks
G. X. Shan, O. Kolednik, F. D. Fischer and **H. P. Stüwe**	99	A 2D model for numerical investigations of stable crack growth in thick smooth fracture mechanics specimens
S. C. Pal and **M. L. Ghosh**	107	High frequency scattering of plane horizontal shear waves by a Griffith crack propagating along the bimaterial interface
F. B. A. Beshara	119	Smeared crack analysis for reinforced concrete structures under blast-type loading
	I	Software Survey Section

NUMBER 2

Zhu Zhe-ming	141	A new method for measurement of fracture toughness K_{IC} by three point bend specimen
K. N. Ramachandran Nambissan and **M. Sreekumar**	149	Influence of crack closure on SIF for plates under bending—a mixed mode case

M. S. Wu	159	Analysis of finite anisotropic media containing multiple cracks using superposition
G. S. Wang	177	A generalized WF solution for mode I 2D part-elliptical cracks
T. P. J. Mikkola	209	Applications of the weight function method
S. Wu and **A. Chudnovsky**	233	The effective elastic properties of a solid with crazes
C. W. Woo and **D. L. Li**	245	Statistical analysis of material damage with changing internal structure
H. H. Harkness and **T. Belytschko**	255	Simple estimates of stress intensity factors by crack path approximation with application to fatigue reliability
G. D. Stefanou, P. Koliopoulos and **E. Nichol**	265	Effects of stress rates on the strength and deformation of concrete at ambient and elevated temperatures
S. Roy, R. J. Dexter and **A. F. Fossum**	277	A computational procedure for the simulation of ductile fracture with large plastic deformation
		Announcement
	295	European Symposium on Impact and Dynamic Fracture of Polymers and Composites, Sardinia, Italy, 20–22 September 1993
	I	Software Survey Section

NUMBER 3

M. R. Bayoumi	297	Fatigue behaviour of a commercial aluminium alloy in sea water at different temperatures
Kang Yong Lee and **Jeong Kyun Hong**	309	Boundary element analysis of thermal stress intensity factors for cusp crack in transient state
K. M. Lin, C. T. Hu and **Sanboh Lee**	321	Screw dislocation dipoles near an internal crack
A. R. Rosenfield and **C. W. Marschall**	333	Fracture mechanics-based failure analysis
C. P. Spyropoulos	339	Comparison of accurate with approximate expressions of stresses for the interface crack problem
June Wang	349	An anisotropic damage mechanics model for fatigue failure
R. B. Stonesifer, F. W. Brust and **B. N. Leis**	357	Mixed-mode stress intensity factors for interacting semi-elliptical surface cracks in a plate

W. F. Li and **S. Y. Du** 381 Modelling of anisotropic damage at a crack tip in composite laminates

Yin Fei 387 A basic study for predicting the disaster in rock engineering with an acoustic emission technique

Z. P. Bažant, Shang-Ping Bai and **R. Gettu** 393 Fracture of rock: effect of loading rate

Y. K. Cheung and **Chang-Chun Wu** 399 Incompatible numerical simulation of the axisymmetric cracked body made of ideally elastic–plastic material

H. M. Shu, J. Petit, Z. D. Jiang and **G. Bezine** 407 Stress intensity factors and interaction of three cracks on both edges of finite width sheet

I Software Survey Section

NUMBER 4

V. Srinivas and **P. Vasudevan** 415 Studies of mixed mode crack propagation in D16AT aluminium alloy

W. T. Ang and **G. Noone** 431 Coplanar cracks in a finite rectangular anisotropic elastic slab under antiplane shear stresses: a hypersingular integral formulation

C. K. Chao, C. H. Liu and **H. J. Wu** 439 Numerical and failure analysis on the drawing of a circular cylindrical cup

A. Bhattacharya 451 Rigid body rotation near mode I crack in infinite orthotropic plate

L. Bartosiewicz, A. R. Krause, A. Sengupta and **S. K. Putatunda** 463 Application of a new model for fatigue threshold in a structural steel weldment

Ching-Hwei Chue, Ming-Long Wu and **Chih-Hsiang Chang** 479 Shearing effects on a shaft with circular surface crack under rotary bending

H. R. Mayer, S. E. Stanzl-Tschegg and **D. M. Tan** 487 FEM modelling of stress intensity factors for fatigue crack growth at ultrasonic frequencies

H. Nisitani, H. Noguchi and **Y.-H. Kim** 497 Fatigue process in short carbon-fiber reinforced polyamide 6.6 under rotating–bending and torsional fatigue

Diao Xiaoxue and **Xing Xiusan** 513 Statistical theory of ceramic damage and fracture

Jiun-Ren Hwang and **Hsiu-Hung Chang** 519 Study on threshold fatigue crack growth characteristics of electron beam welding in AISI 4130 steel

Li-Ren Tsau and **R. Plunkett** 529 Finite element analysis of progressive failure for laminated FRP plates with inplane loading

Wang Qizhi and **Xian Xuefu** 547 The compliance of three-point bend round beam specimens calculated with the slice synthesis method

I Software Survey Section

NUMBER 5

M. O. Lai, J. T. Oh and **A. Y. C. Nee** 551 Fatigue properties of holes with residual stresses

C. W. Woo and **L. W. Samson Chan** 559 Composite laminate crack problems using the boundary collocation method

E. N. Karapetian 575 The elastic field of an internal circular crack subjected to a linear normal loading

V. Bicego, A. Elli and **C. Rinaldi** 587 A predictive approach to cleavage fracture events in the transition region

N. Miyazaki, T. Ikeda, T. Soda and **T. Munakata** 599 Stress intensity factor analysis of interface crack using boundary element method—application of contour-integral method

Qing-Qing Ni and **Eiichi Jinen** 611 Acoustic emission and fracture of carbon fiber reinforced thermosoftening plastic (CFRTP) materials under monotonous tensile loading

H. Schäbe 627 On the construction of a nonlinear damage accumulation hypothesis

T. A. Michalske, W. L. Smith and **E. P. Chen** 637 Stress intensity calibration for the double cleavage drilled compression specimen

J. H. Lau 643 Thermal fatigue life prediction of flip chip solder joints by fracture mechanics method

C. Makabe, H. Kaneshiro, M. Itokazu and **K. Ohba** 655 An inspection of fatigue crack extension based on strain information

Y. W. Kwon 663 Study of crack closure in laminated composite shells

Dai-heng Chen and **H. Nisitani** 671 Detection of a crack by body force method

A. E.-F. A. Rizk 687 A cracked plate under transient thermal stresses due to surface heating

Wen-Fang Wu 697 Computer simulation and reliability analysis of fatigue crack propagation under random loading

Technical Note

Xu Li 713 J-integral and J^*-integral in thermal stress conditions

I Software Survey Section

NUMBER 6

T. Premack and **A. S. Douglas**	717	An analysis of the crack tip fields in a ductile three-point bend specimen subjected to impact loading
J. Macheret and **R. J. Bucci**	729	A crack growth resistance curve approach to fiber/metal laminate fracture toughness evaluation
A. Iost	741	Temperature dependence of stage II fatigue crack growth rate
K. H. Schwalbe	751	Estimating the load line displacement of cracked laboratory specimens using the engineering treatment model (ETM)
P. K. Liaw, A. Saxena and **J. Perrin**	759	Life extension technology for steam pipe systems—I. Development of material properties
P. K. Liaw, A. Saxena and **J. S. Perrin**	787	Life extension technology for steam pipe systems—II. Development of life prediction methodology
Tie-Jun Wang	799	Micro- and macroscopic damage and fracture behaviour of welding coarse grained heat affected zone of a low alloy steel: mechanisms and modelling
Yong Li Xu and **K. L. Reifsnider**	813	A micromechanical analysis of fiber crack propagation in composite materials due to transverse tensile loads
C. K. Chao and **R. C. Chang**	831	Hygrothermal stresses for a plane crack in a generally anisotropic plate
C. K. Chao and **J. L. Wang**	843	Failure prediction of a plate weakened by an elliptic hole under thermal or mechanical load
Guo Wanlin	857	Elastic–plastic analysis of a finite sheet with a cold-worked hole
V. G. Mukunda and **L. R. Dharani**	865	A comparison of classical and consistent shear lag models for failure analysis of unidirectional composites
V. V. Kalaida and **A. V. Naumov**	875	Calculation of the current value of stress intensity factor under impact testing
Kang Yong Lee and **Soon Man Kwon**	881	Interlaminar fracture toughness for composite materials
Lu Minxu and **Zheng Xiulin**	889	A new microcomputer-aided system for measuring fatigue crack propagation threshold and selecting testing parameters
